FEATURED MODEL	JCB LOADALL 531-70
----------------	--------------------

The side mounted JCB engine combined with JCB axles and transmission, ensure reliable drive train performance from well proven components. Instant steering selection between all wheel steer, front wheel steer and crab steer modes ensures ease of operation, whilst a tight turn radius of 3.7 metres gives greater manoeuvrability. Forward reach of 3.7 metres, lift capacity 3.1 tonnes and lift height of 7 metres, all improve productive capability. Powershift transmission allows on the move gear changes for faster cycle times and quicker travelling. Low centre of gravity and long wheelbase increase stability, for both roading and load placing.
