FEATURED MODEL **NIFTYLIFT HR28 HYBRID**

The HeightRider 28 (HR28) 4x4 hybrid delivers outstanding performance from a compact and low-weight design offering the following benefits:

- Light and compact for its size with a small tail swing, this coupled with its excellent manoeuvrability means that it can work in more locations than its larger rivals
- 180° cage rotation and a 150° fly-boom allow precise positioning anywhere in its vast working envelope
- Its revolutionary second-generation Hybrid power system incorporates a smaller, power-optimised EU Stage V compliant Diesel engine, supported by the machine's electric motor when extra power is needed
