facelift
access and safety made easy

The Ascendant 12.5m is a flexible van mounted cherry picker. Perfect for small jobs where you have lots of tools, it has a best in class spare payload capacity of 350kg, good kerb side access, and quick set up, all in a 3.5 tonne van that you can park anywhere. Getting in the air in a tight space is easy thanks to having zero tail swing and two independently operated booms. The large cage is insulated GRP and has a 230kg max load, giving you plenty of capacity to take a range of tools with you up to work.

The information provided is for guidance only. It may change at any time in accordance with manufacturer's specification.
